SYSTEMS,  
INFRASTRUCTURE,  
AND SMART  
OPERATIONS  
UNDER CONTROL.

WHAT JUDZAD DOES

# WE BUILD THE OPERATING LAYER BEHIND DEPENDABLE ORGANIZATIONS.

Judzad designs, integrates, secures, installs, tests, monitors, and maintains the technology systems businesses rely on.

SYSTEMS UNDER CONTROL

SECURITY AND RELIABILITY

EXECUTIVE VISIBILITY

PRACTICAL DELIVERY

## REGIONAL PRESENCE

# REGISTERED ACROSS FOUR MARKETS WITH A MIDDLE EAST DELIVERY FOCUS .

The profile keeps the old regional proof, but strips out the generic corporate wording around it.

VISION

A REGIONAL  
SYSTEMS  
INTEGRATOR  
FOR SMART,  
SECURE,  
SUSTAINABLE  
TECHNOLOGY.

MISSION

SUPPORT DIGITAL  
TRANSFORMATION  
THROUGH  
INFRASTRUCTURE THAT  
IS SECURE,  
OBSERVABLE,  
MAINTAINABLE, AND  
READY FOR GROWTH.

## INDUSTRIES SERVED

# BUILT FOR ENVIRONMENTS WHERE SYSTEMS FAILURE HAS REAL COST.

Judzad serves a wide field of environments that depend on reliable infrastructure, security, visibility, and technical support.

 Healthcare and hospitals

 Finance and enterprise operations

 Retail and logistics

 Government and public services

 Telecommunications

 Airports and transportation

 Hospitality and residential compounds

 Education and campus environments

ALL CAPABILITIES

# THE COMPLETE SERVICE FIELD, ORGANIZED FOR DECISION MAKERS.

The service field is organized around the decisions clients need to make: infrastructure, safety, connectivity, smart systems, delivery, and support.

01

IT and ICT infrastructure

02

Networking and connectivity

03

ELV and low-current systems

04

AV, lighting, PA, SMATV, IPTV

05

Security, access, CCTV, fire alarm

06

Telecom towers, radar, wiring, cabling

07

Cybersecurity, monitoring, hosting, data

08

Power backup, IT hardware, computer repair

09

Smart cities, buildings, IoT, automation

10

Consultancy, integration, delivery, O&amp;M

ICT INFRASTRUCTURE

# BUSINESS TECHNOLOGY BUILT AS USABLE INFRASTRUCTURE.

Judzad covers the working base of business IT: devices, networks, software environments, communication systems, hosting infrastructure, and the support routines that keep them dependable.

✔ IT services and ICT infrastructure

✔ Computers, communication tools, and internet systems

✔ Business software and digital platforms

✔ Support operations for daily technology needs

RELIABLE CONNECTIVITY

# NETWORKS FOR SITES, TEAMS, CLOUD, AND DISTRIBUTED WORK.

The networking scope includes architecture, implementation, protection, monitoring, wireless, SD-WAN, VoIP, and unified communications.

✓ LAN, WAN, wireless, and cloud networking

✓ SD-WAN and multi-site performance

✓ Network monitoring and management

✓ Firewalls, VPN, segmentation, and threat protection

✓ VoIP and unified communications

## ELV SYSTEMS

# FACILITY SYSTEMS CONNECTED TO ONE CONTROL LANGUAGE.

Low-current systems are treated as critical building infrastructure, especially in environments where continuity, monitoring, and access control matter.

✓ Fire alarm systems

✓ CCTV systems

✓ Access control

✓ Public address

✓ SMATU and IPTU

✓ Building management systems

✓ Structured cabling

SPACES THAT COMMUNICATE

# AUDIO, VISUAL, AND LIGHTING SYSTEMS FOR REAL ROOMS.

From boardrooms and classrooms to hotels, airports, universities, and public spaces, Judzad designs systems that are clear, controllable, and maintainable.

✓ Audio visual systems

✓ Architectural and  
entertainment lighting

✓ Lighting systems  
installation

✓ Public address and AV  
distribution

✓ Board rooms, classrooms,  
conference rooms

## PROTECTED SPACES

# DETECTION, ACCESS, AND SURVEILLANCE WORKING TOGETHER.

Security devices should not sit as isolated boxes. Judzad aligns fire alarm, CCTV, access control, intrusion detection, and operating routines into one accountable environment.

✓ Fire detection and fire alarm

✓ Access control systems

✓ Closed circuit television systems

✓ Security devices installation and maintenance

✓ Intrusion detection

✓ Monitoring and response routines

FIELD INFRASTRUCTURE

# TELECOMMUNICATIONS, RADAR, TOWERS, WIRING, AND CABLING.

Judzad supports the physical work behind connected sites, from towers and station infrastructure to wiring, extension, and network cabling.

- ✓ Telecommunication and radar stations
- ✓ Telecommunication and radar towers
- ✓ Electrical wiring installation
- ✓ Telecommunications wiring installation
- ✓ Television and satellite network extension
- ✓ Computer and communication network extension
- ✓ Network and structured cabling

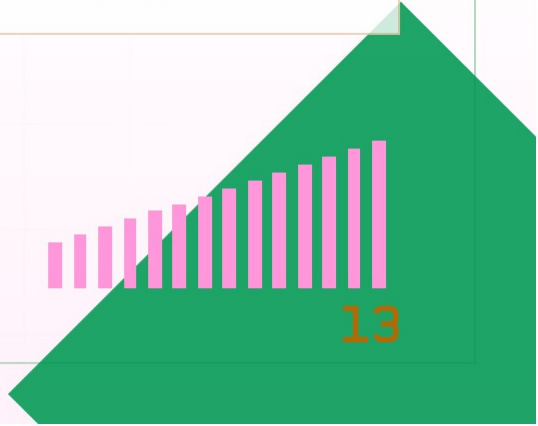

OPERATIONAL VISIBILITY

# SECURITY, MONITORING, HOSTING, AND DATA INFRASTRUCTURE.

Cybersecurity, monitoring, hosting, data processing, and call center capability form one operational control layer for connected organizations.

- ✓ Cybersecurity services
- ✓ Telecom and information network management
- ✓ Network monitoring services
- ✓ Website hosting infrastructure
- ✓ Data processing infrastructure
- ✓ Related hosting and platform activities
- ✓ Call center services
- ✓ Complete data center infrastructure

## CONTINUITY BASICS

# THE PHYSICAL LAYER THAT KEEPS TEAMS WORKING.

Reliable operations depend on power protection, hardware readiness, endpoint maintenance, and practical repair capacity.

✓ Power backup and UPS

✓ Repair and maintenance of personal computers

✓ Solar energy network installation

✓ IT hardware solutions

✓ Repair and maintenance of laptop computers

✓ Solar energy network maintenance and repair

CONNECTED ENVIRONMENTS

# SMART INFRASTRUCTURE WITH USEFUL DATA BEHIND IT.

Smart systems should improve operations, not just add sensors. Judzad designs connected environments around data, control, and maintainability.

✓ Smart cities and infrastructure

✓ Smart buildings and facilities

✓ Smart healthcare

✓ Smart retail

✓ Building and energy management

✓ Facility monitoring and control

SENSORS TO ACTION

# IOT ECOSYSTEMS FOR AUTOMATION, TRACKING, AND LIVE OPERATIONS.

Judzad connects physical assets to useful digital state: sensors, devices, connectivity, dashboards, and automation routines.

✓ IoT services

✓ Industrial automation and smart manufacturing

✓ Smart parking management

✓ Smart trolley management

✓ Sensor integration and device connectivity

✓ Cloud platforms and data analytics

## STRATEGIC GUIDANCE

# ADVICE THAT TURNS INTO IMPLEMENTATION.

Consultancy is not treated as a report exercise. Judzad helps clients define the technical path, improve operations, adopt the right technology, and move into delivery.

✓ Technology adoption planning

✓ Digital transformation strategy

✓ Market and site expansion support

✓ Process improvement

✓ Sustainability and efficiency initiatives

CONNECTED PLATFORMS

# SEPARATE SYSTEMS MADE TO OPERATE AS ONE ENVIRONMENT .

Jud zad integrates legacy platforms, cloud applications, business systems, IoT layers, AI-enabled tools, and operational data flows.

✓ Legacy and modern system integration

✓ Cloud and application connectivity

✓ ERP and CRM integration support

✓ IoT and AI platform integration

✓ Secure and scalable data flow

FROM CONCEPT TO SITE

# DESIGNED CLEARLY, INSTALLED CAREFULLY, HANDED OVER CLEANLY.

Delivery starts with understanding the site, requirements, and risk. Installation follows the design, with minimal disruption and clear technical accountability.

- ✓ Technical design and consulting
- ✓ Conceptual and detailed layouts
- ✓ Network and infrastructure installation
- ✓ IoT and smart system deployment
- ✓ Quality and safety standards

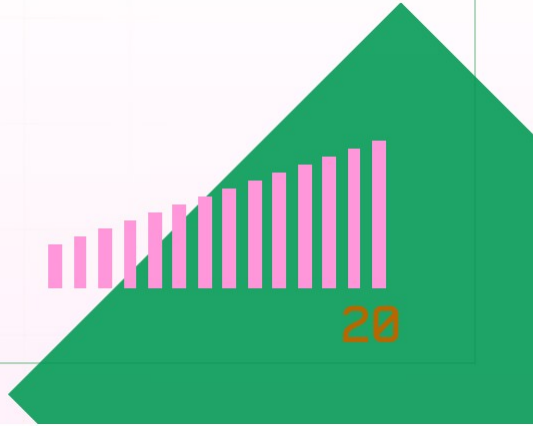

COMMISSIONING

**SYSTEMS ARE NOT COMPLETE UNTIL THEY PROVE THEMSELVES.**

Testing and commissioning verify that systems work in factory, lab, site, integration, and full operating conditions.

- ✓ Factory acceptance test
- ✓ Laboratory acceptance test
- ✓ Functional test
- ✓ Site acceptance test
- ✓ Integration acceptance test
- ✓ Full systems testing and commissioning
- ✓ System availability test

## OPERATIONS AND MAINTENANCE

# INFRASTRUCTURE VALUE DEPENDS ON WHAT HAPPENS AFTER LAUNCH.

Judzad supports systems through monitoring, maintenance, incident handling, lifecycle planning, and practical routines that keep operations stable.

✓ Operation and maintenance services

✓ Preventive maintenance

✓ Corrective maintenance

✓ Remote and on-site support

✓ Vendor coordination

✓ Lifecycle and upgrade planning

CORE VALUES

VALUES ARE  
ONLY USEFUL  
WHEN THEY  
CHANGE HOW  
WORK IS DONE.

01

Integrity in decisions and delivery.

02

Innovation where it improves reliability.

03

Customer focus over generic packages.

04

Transparent communication, coordination, and collaboration.

SELECTED CLIENTS

COMMERCIAL,  
HOSPITALITY,  
EDUCATION,  
SPORTS,  
AND  
DEVELOPMENT  
WORK.

Selected client relationships across operational environments where reliable systems, support, and delivery discipline matter.

01

Tatweer

02

Leejam

03

Liwan

04

Armah

05

Body Masters

06

XFit Fitness

07

Ezdihar Sports

08

Al Mashreq Boutique  
Hotel

09

Riyadh Gallery

10

## CLIENT AND SECTOR PROOF

# A BROAD TECHNICAL SCOPE FOR DEMANDING PUBLIC AND PRIVATE ENVIRONMENTS.

Sector proof shows where Judzad's service range applies: complex environments, public and private operations, and sites where uptime matters.

👁 Healthcare and hospitals

👁 Finance and enterprise operations

👁 Retail and logistics

👁 Government and public services

👁 Telecommunications

👁 Airports and transportation

👁 Hospitality and residential compounds

👁 Education and campus environments
